

1 to democracy. We do suggest to you that the higher the  
2 percentage of the turnout, the more small d, sometimes  
3 large D democratic is the response. This has been  
4 documented again by Mr. Bain and I do have statistics,  
5 this is where I am going to try to cut my presentation,  
6 I have statistics all over the place considering every  
7 comment I am going to make. I originally intended to go  
8 through them with you. I think I would prefer simply to  
9 make the statement and have you challenge me and then we  
10 will have to document it. I would like to give some  
11 credit while here to Stephanie, one of the pages who  
12 worked many, many long hours taking sample ballots all  
13 over the state for all kinds of elections and going  
14 through them and marking off all the officials we had  
15 eliminated from the ballot, counting all slots that are  
16 used on the ballot and then suggesting to me on a piece  
17 of paper the residue. The point of that was to indicate  
18 to you that there is a great deal of room left on the  
19 ballot in most of the areas, the most heavily populated  
20 ballots are in Montgomery and Prince Georges where it is  
21 an average in state election of 220 out of 400 ballot
